***Allowable Subject Matter***

Claims 1, 2, and 6-9 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record does not teach or suggest a method for producing a phenolic novolak comprising a heterogeneous reaction system using a phosphoric acid and an oxygen containing solvent in the claimed amounts. The closest prior art is Nakano et al. (US Pat. 4,876,324). Nakano et al. teaches a process for producing a phenolic novolak (1:23-25) comprising a step of conducting a heterogeneous reaction (6:24-40) of a phenol and aldehyde (1:23-25) in the presence of phosphoric acid (5:53-56) and an alcoholic or glycol based ether solvent (5:39-45). However, Nakano et al. does not teach the higher phosphoric acid amount. As Nankano et al. is concerned with high molecular weight products (abstract) and the original specification indicates that an increased amount of phosphoric acid would reduce the molecular weight of the resin (8:1-17 and 12:20-3:13) a person having ordinary skill in the art at the time of invention would not have found it obvious to increase the amount of phosphoric acid in Nankano et al.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
